What's One Way a Math Student's Life can be Positively Transformed?

Bloomington, Indiana – June 9, 2020 – “Augmented Intelligence is one way a Math Student's Life can be transformed in a very positive way,” claims Craig Hane, Ph.D., CEO of Triad Math Inc.

“Intelligence” is the ability to learn Concepts and Solve Problems. Augmenting one's Intelligence is simply increasing one's Intelligence. This is true in all fields and especially in the field of Mathematics.

“So what is some way this can be accomplished?” you might ask.

“In Math one great way to do this is to “Master the Use of the TI-30Xa Scientific Calculator” to perform all arithmetic operations. The classical obsolete manual algorithms are often a great Barrier to many students in learning math. They are difficult and boring to learn, and difficult and error prone to apply,” explains Dr. Hane. Would you agree?

This Barrier no longer exists once a student Masters the Use of a Scientific Calculator like the TI-30Xa, which costs less than \$10, and is more powerful than the original HP-35 which cost over \$2,400 in 2020 Dollars back in 1972.

Dr. Hane has recently created a Printed Book on demand by Amazon named “Master the TI-30Xa Scientific Calculator” which contains 25 Lessons with Notes and Exercises along with access to 25 Tutorial Videos delivered from Amazon Web Services. You may learn about this by going to Amazon via <https://amzn.to/30wRcJ3>

“It's pretty amazing that a student's life can be positively transformed for less than \$25 with a \$15 book and \$9 calculator. But, that's what our 21st Century brings to us via “Augmented Intelligence”, says Dr. Hane.

In his new book, “Master the TI-30Xa Scientific Calculator”, Dr. Hane also tells you about an even more powerful Math Tool for even greater Augmented Intelligence, and which is now available since 2009 and is free. For more information, please visit Dr. Hane’s personal website: CraigHane.com.

About Dr. Craig Hane

Dr. Craig Hane holds a Ph.D. in Theoretical Math from Indiana University Bloomington and is the Founder of Triad Math Inc. He has taught math from high school through advanced theoretical math at the university level, while training thousands of skilled tradesmen in his sixty plus years of experience. Dr. Hane’s wealth of experience in both academia and private industry has given him a unique

perspective and his mission is to revolutionize the current U.S. math curriculum for student success and economic gains. For more information, please visit: craighane.com.

About Triad Math Inc.

Triad Math Inc. was founded by Dr. Craig Hane, and offers a tiered approach to post-elementary math. Triad Math's online math curriculums are used by homeschool families, as well as adults needing to refresh their basic math skills. For more information, please visit: TriadMathInc.com
